EXPERIENCE:

Web App Development Learning Experience

Duration: More than 2 years

• Gained hands-on experience in full-stack development (ReactJS, NodeJS).

- Worked on real-world projects to strengthen coding skills in both frontend and backend development.

- Focused on building efficient, scalable, and user-friendly web Applications

EDUCATION:

Intermediate in Computer Science

Government Degree Boys College 5-L, New Karachi

Completed: August 2024

- Matriculation in Computer Science

Public School and College, Karachi

Completed: 2022

PROJECTS:

AI Chat Bot (Google Gemini Clone)

Developed using ReactJS with optimized state management via useContext hook.

- Integrated conversational AI features for seamless user interaction.
- Focused on real-time performance and a user-friendly interface.

E-Commerce Store

Built using React and Tailwind CSS, with add-to-basket and remove-from-basket functionality.

- State management implemented with Redux.

- Integrated Google Authentication using Firebase for secure login.

Admin Panel

Developed a React-based admin panel with custom CSS for handling administrative tasks.

- Implemented routing and data visualization features for a smooth user experience.
